

set_filename

```
graph LR; add_blacklist_entry --> check_blacklist_entry; add_blacklist_entry --> set_filename; check_blacklist_entry --> set_filename; add_whitelist_entry --> check_whitelist_entry; add_whitelist_entry --> set_filename; check_whitelist_entry --> set_filename;
```

The diagram is a control flow graph with five nodes. The 'set_filename' node is highlighted with a gray background and is located on the left. It has three incoming arrows: one from 'check_blacklist_entry' (top center), one from 'add_blacklist_entry' (top right), and one from 'check_whitelist_entry' (bottom center). The 'add_blacklist_entry' node (top right) has two outgoing arrows: one to 'check_blacklist_entry' and one to 'set_filename'. The 'add_whitelist_entry' node (middle right) has two outgoing arrows: one to 'check_whitelist_entry' and one to 'set_filename'. The 'check_blacklist_entry' node (top center) has one outgoing arrow to 'set_filename'. The 'check_whitelist_entry' node (bottom center) has one outgoing arrow to 'set_filename'.
